#21toWatch

#21toWatch is an annual campaign to spotlight and celebrate the world-class science and technology entrepreneurs, startups and ground-breaking innovation from across Cambridgeshire and the East of England.

The #21toWatch list, made up of the people, the companies and the 'things', is collated throughout the year. With such diversity and ingenuity amongst the #21toWatch cohort, the attributes each submission is assessed on are Innovation, Challenge, Influence, Viability and Memorability.

The longlists are updated on a rolling basis, with a nomination window open until 15th January each year, the shortlist is announced at the start of February, with the annual #21toWatch Top.21 unveiled in a unique event the first Thursday in March - in 2024 the event will be on Thursday 7th March.

Many on our list (not just the Top21!) have gone on to achieve great things, including enhanced promotions, additional investment, new clients and a variety of other opportunities.

Our sponsors and partners also view the cofinitive #21toWatch campaign as a key investment for them as they support new ventures and opportunities - many use the longlist as a business development opportunity that has credibility that they can utilise.

90%
of attendees
made good
connections

85%
of attendees
planned to follow
up with all or a few
of the Top.21

67%
of attendees believed
they would secure
new business
immediately after
the event

In 2023 we were proud to be supported by the following companies and organisations:
